OBJECTIVE

Seeking an AI/ML Engineer role to apply hands-on expertise in Large Language Model (LLM) orchestration, MLOps, and scalable data pipeline architecture. Eager to contribute to model deployment, production AI systems, and backend engineering at a fast-paced technology organization.

SUMMARY

B.Tech graduate with hands-on experience building multi-agent systems, Retrieval-Augmented Generation (RAG) data pipelines, and LLM guardrails using Python, FastAPI, and Docker. Deployed scalable AI microservices on AWS and OCI with Kubernetes. Active contributor in Software Incubator, Programming Club, and Cloud Computing Club at AKGEC. Oracle GenAI and Data Science certified.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, Bash

AI / ML: Large Language Models (LLaMA 3, GPT), Retrieval-Augmented Generation (RAG), Multi-Agent Orchestration, Prompt Engineering, Guardrails, Sentence-Transformers

MLOps: Model Deployment, Data Pipeline Design, LLM Evaluation (LLM-as-a-Judge), Dynamic Model Failover, Scalable Architecture

Frameworks: FastAPI, Pytest, ChromaDB (Vector Database), GSAP, Three.js, scikit-learn

Cloud / DevOps: Docker, Kubernetes, AWS (EC2, S3), Oracle Cloud (OCI), CI/CD Pipelines, GitHub Actions

Tools: Git, REST APIs, JSON Schema Validation, Server-Sent Events (SSE)

PROFESSIONAL EXPERIENCE

Technical Member - Software Incubator (Part-Time)

Ajay Kumar Garg Engineering College (AKGEC) | Jan 2026 - Present

- Developed a stateful enterprise compliance agent with persistent memory and tool calling capabilities.
- Built an LLM-as-a-Judge Evaluation Dashboard scoring agent responses across 5 compliance dimensions.
- Implemented Dynamic Model Failover routing (70B to 8B) ensuring 99.9% uptime during stress testing.
- Designed pre-execution Input Guardrails blocking 100% of adversarial prompt injection attempts.

Core Member - Programming Club (Part-Time)

Ajay Kumar Garg Engineering College (AKGEC) | Aug 2024 - Dec 2025

- Architected a RAG pipeline ingesting large-scale PDFs with 94% retrieval accuracy via ChromaDB.
- Reduced LLM hallucination by 78% using source-grounded generation and citation tracking.
- Exposed 3 FastAPI REST endpoints (/upload, /search, /documents) for production use.
- Mentored 15+ juniors on Python, Git workflows, and API development best practices.

Member - Cloud Computing Club (Part-Time)

Ajay Kumar Garg Engineering College (AKGEC) | Aug 2023 - Jul 2024

- Deployed 5+ containerized AI microservices using Docker and Kubernetes on AWS and OCI.
- Automated 3 CI/CD pipelines with GitHub Actions, reducing deployment time by 60%.
- Completed 2 Oracle certifications (GenAI + Data Science) with 80%+ passing scores.

PROJECTS

Autonomous AI DevOps Swarm

Python, LLaMA 3, Pytest, GitHub API, ReAct Framework

- Built a 4-agent swarm using ReAct loops and LLaMA 3 for autonomous CI/CD failure remediation.
- Reduced mean-time-to-recovery by 90% and achieved 85% first-pass fix accuracy using sandboxed execution.

AI Code Reviewer

Python, FastAPI, GitHub REST API, Groq

- Analyzed 100+ GitHub PRs via LLM, detecting 3.2 issues per review missed by static analysis.
- Enforced strict JSON schema output for structured bug and vulnerability reporting.

Meeting Intelligence System

Python, FastAPI, Groq

- Processed 60-minute transcripts in under 8 seconds with 96% extraction accuracy.
- Generated structured summaries, action items, and follow-up emails automatically.

Document Risk Prediction (ML)

scikit-learn, pandas, Random Forest

- Built a supervised ML pipeline classifying document risk with tuned hyperparameters.
- Compared 4 model architectures and serialized the best performer for production deployment.

EDUCATION

Ajay Kumar Garg Engineering College (AKGEC)

B. Tech in Electronics and Communication Engineering | AKTU | Aug 2022 - May 2026 | CGPA: 7.9

CERTIFICATIONS

- Oracle GenAI Certified Professional (2025)
- Oracle Data Science Professional Certification (2025)
- IoT and Industrial Automation Certification (2025)
