SUMMARY

AI Engineer with hands-on experience building multi-agent orchestration systems, RAG pipelines, and production LLM guardrails using Python, FastAPI, and Docker. Deployed 6 AI projects end-to-end, including an autonomous DevOps swarm that cut debugging time by 90%. Oracle GenAI and Data Science certified. Seeking AI/Backend Engineering roles.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, Bash

AI / ML: LLaMA 3, GPT, RAG, Multi-Agent Orchestration, Prompt Engineering, Guardrails, Sentence-Transformers

Frameworks: FastAPI, Pytest, ChromaDB, GSAP, Three.js, scikit-learn

Cloud / DevOps: Docker, Kubernetes, AWS (EC2, S3), Oracle Cloud (OCI), CI/CD Pipelines, GitHub Actions

Tools: Git, REST APIs, JSON Schema Validation, Server-Sent Events (SSE)

PROFESSIONAL EXPERIENCE

AI Engineer Intern

Apex Intelligence Labs (Remote) | Mar 2026 - Present

- Built a 4-agent DevOps swarm using ReAct loops and LLaMA 3 for autonomous CI/CD remediation.
- Reduced mean-time-to-recovery by 90% across 50+ pipeline failure scenarios.
- Achieved 85% first-pass fix accuracy with sandboxed Pytest verification before PR submission.
- Deployed agents via Docker containers on AWS EC2 with GitHub Actions CI/CD.

Backend AI Developer Intern

Apex Intelligence Labs (Remote) | Jan 2026 - Feb 2026

- Developed a stateful compliance agent with guardrails blocking 100% of prompt injection attempts.
- Built an LLM-as-a-Judge eval dashboard scoring across 5 dimensions with 92% human agreement.
- Implemented dynamic model failover (70B to 8B) ensuring 99.9% uptime over 1,000+ API calls.

AI Software Engineer Intern

Apex Intelligence Labs (Remote) | Nov 2025 - Dec 2025

- Architected a RAG pipeline ingesting 500-page PDFs with 94% retrieval accuracy via ChromaDB.
- Reduced hallucination rate by 78% using source-grounded generation and citation tracking.
- Exposed 3 REST endpoints (/upload, /search, /documents) via FastAPI for enterprise consumption.

PROJECTS

AI Code Reviewer

Python, FastAPI, GitHub REST API, Groq

- Analyzed 100+ GitHub PRs via LLM, detecting 3.2 issues per review missed by static analysis.
- Enforced strict JSON schema output for structured bug and vulnerability reporting.

Meeting Intelligence System

Python, FastAPI, Groq

- Processed 60-minute transcripts in under 8 seconds with 96% extraction accuracy.
- Generated structured summaries, action items, and follow-up emails automatically.

Document Risk Prediction (ML)

scikit-learn, pandas, Random Forest

- Built a supervised ML pipeline classifying document risk with tuned hyperparameters.
- Compared 4 model architectures and serialized the best performer for production deployment.

EDUCATION

Dr. Abdul Kalam Technical University

B. Tech in Electronics and Communication Engineering | Aug 2022 - May 2026 | CGPA: 7.9

CERTIFICATIONS

- Oracle GenAI Certified Professional (2025)
- Oracle Data Science Professional Certification (2025)
- IoT and Industrial Automation Certification (2025)
