Ghaziabad, Uttar Pradesh

SUMMARY

B.Tech graduate with hands-on experience building multi-agent systems, Retrieval-Augmented Generation (RAG) data pipelines, and LLM guardrails using Python, FastAPI, and Docker. Deployed scalable AI microservices on AWS and OCI with Kubernetes. Active contributor in Software Incubator, Programming Club, and Cloud Computing Club at AKGEC. Oracle GenAI and Data Science certified.

TECHNICAL SKILLS

Multi-Agent Orchestration	ReAct Framework	Retrieval-Augmented Generation (RAG)	Large Language Models (LLaMA 3, GPT)
Guardrails	Prompt Engineering	Python	JavaScript
		SQL	Bash

WORK EXPERIENCE

Software Incubator (AKGEC)

Jan 2026 - Present

Technical Member (Part-Time)

- Partnered with internal stakeholders to translate complex requirements into scalable evaluation frameworks and concrete technical specs.
- Developed a stateful enterprise compliance agent with persistent memory and tool calling capabilities.
- Built an LLM-as-a-Judge Evaluation Dashboard scoring agent responses across 5 compliance dimensions.
- Implemented Dynamic Model Failover routing (70B to 8B) ensuring 99.9% uptime during stress testing.
- Designed pre-execution Input Guardrails blocking 100% of adversarial prompt injection attempts.

Programming Club (AKGEC)

Aug 2024 - Dec 2025

Core Member (Part-Time)

- Architected a RAG pipeline ingesting large-scale PDFs with 94% retrieval accuracy via ChromaDB.
- Reduced LLM hallucination by 78% using source-grounded generation and citation tracking.
- Exposed 3 FastAPI REST endpoints (/upload, /search, /documents) for production use.
- Mentored 15+ juniors on Python, Git workflows, and API development best practices.

Cloud Computing Club (AKGEC)

Aug 2023 - Jul 2024

Member (Part-Time)

- Deployed 5+ containerized AI microservices using Docker and Kubernetes on AWS and OCI.
- Automated 3 CI/CD pipelines with GitHub Actions, reducing deployment time by 60%.
- Completed 2 Oracle certifications (GenAI + Data Science) with 80%+ passing scores.

PROJECTS

Autonomous AI DevOps Swarm ReAct

Built a 4-agent swarm using ReAct loops and LLaMA 3 for autonomous CI/CD failure remediation. Reduced mean-time-to-recovery by 90% and achieved 85% first-pass fix accuracy using sandboxed execution.

Python, LLaMA 3, Pytest, GitHub API, ReAct Framework

AI Code Reviewer FastAPI

Analyzed 100+ GitHub PRs via LLM, detecting 3.2 issues per review missed by static analysis. Enforced strict JSON schema output for structured bug and vulnerability reporting.

Python, FastAPI, GitHub REST API, Groq

Meeting Intelligence System LLM

Processed 60-minute transcripts in under 8 seconds with 96% extraction accuracy. Generated structured summaries, action items, and follow-up emails automatically.

Python, FastAPI, Groq

Document Risk Prediction ML

Built a supervised ML pipeline classifying document risk with tuned hyperparameters. Compared 4 model architectures and serialized the best performer for production deployment.

scikit-learn, pandas, Random Forest

EDUCATION

B. Tech in Electronics and Communication Engineering (CGPA: 7.9) Aug 2022 - May 2026
Ajay Kumar Garg Engineering College (AKGEC)

CERTIFICATIONS

Oracle GenAI Certified Professional	2025
Oracle Data Science Professional Certification	2025
IoT and Industrial Automation Certification	2025

ADDITIONAL SKILLS

Frameworks: FastAPI, Pytest, ChromaDB (Vector Database), GSAP, Three.js, scikit-learn

Cloud / DevOps: Docker, Kubernetes, AWS (EC2, S3), Oracle Cloud (OCI), CI/CD Pipelines, GitHub Actions

Tools: Git, REST APIs, JSON Schema Validation, Server-Sent Events (SSE)
