Location: Ghaziabad, Uttar Pradesh, India

SUMMARY

Results-driven AI & Machine Learning Engineer with hands-on expertise in designing and deploying intelligent, scalable systems. Proficient in Deep Learning, Large Language Models (LLMs), Computer Vision, and Natural Language Processing (NLP). Experienced in end-to-end MLOps, RAG (Retrieval-Augmented Generation) architectures, and deploying models into production using TensorFlow, PyTorch, and modern AI frameworks. Passionate about solving complex problems through Generative AI and data-driven software development.

EXPERIENCE

Machine Learning Intern - *Software Incubator, AKGEC* (Feb 2023 - Mar 2025)

- Architected and deployed end-to-end Machine Learning pipelines and predictive models using Python, TensorFlow, and scikit-learn.
- Engineered robust data preprocessing, feature engineering, and model validation workflows to ensure high accuracy and generalization.
- Integrated LLMs and Computer Vision systems into production environments, applying MLOps practices for reliable deployment.
- Collaborated in cross-functional agile teams to translate product requirements into scalable AI solutions and software deliverables.

SKILLS

- **Programming:** Python, C++, TypeScript, JavaScript, SQL
- **AI & Deep Learning:** Large Language Models (LLMs), Generative AI, RAG, NLP, Computer Vision, YOLO, OpenCV
- **ML Frameworks:** TensorFlow, PyTorch, scikit-learn, Pandas, NumPy
- **Cloud & MLOps:** Google Cloud (GCP), Oracle Cloud, Git, Docker, Kubernetes, CI/CD, Jupyter, REST APIs, Model Deployment

PROJECTS

- **Clara AI (Multimodal AI Receptionist)** - Engineered a sophisticated clinical AI agent utilizing Generative AI, structured JSON parsing, and Vision AI for patient triage and SOAP note generation.
- **Autonomous AI Search & Rescue Drone System** - Developed Computer Vision models for real-time victim localization and intelligent payload delivery.
- **Vision Detection with YOLO + OpenCV** - Built and optimized Deep Learning object detection pipelines for real-time video feeds.
- **Predictive Analytics Pipeline** - Designed supervised learning workflows with TensorFlow for complex dataset pattern recognition.
- **AI Resume-to-Role Matching Assistant** - Created an advanced NLP and RAG-based tool for intelligent job matching and semantic search analysis.

EDUCATION

Bachelor of Technology in Electronics and Communication Engineering

Ajay Kumar Garg Engineering College, Ghaziabad
